

# WONDER AND AWE Monarch Butterflies For Children!

Science comes alive thru  
science-based fun story and  
live-action photo BOOK!

Great to take to school in K-3<sup>rd</sup> grade!  
Meets STEM curriculum

Literacy + Creativity + Science!

## The Story of Chester, the Monarch Caterpillar/Larva

By Susie Vanderlip  
Monarch Butterfly Citizen Scientist,  
Author and Photographer

## **SUSIE VANDERLIP**

Monarch Butterfly Citizen Scientist, Professional Speaker, Author, Photographer

Susie Vanderlip has raised hundreds of monarch butterflies in her garden. As a Citizen Scientist, she provides field data to Monarch Health project at the University of Georgia and Tagging Studies at Cal Poly San Luis Obispo (<http://youtu.be/gXJy0gWZApA>). She is involved in research to sustain the Monarch Butterfly population during its current significant decline.

Susie shares her exciting and informative talk, “Everything You Ever Wanted to Know About Monarch Butterflies” across the country at botanic gardens, garden clubs, nurseries, pollinator festivals, garden expos and at schools for children. Using photos, video and science-based information, she educates young and old, and teaches them how to attract and raise monarch butterflies in their gardens, too. Susie is passionate about teaching children to look for science all around them in their everyday world and to love and protect nature.

***THE STORY OF CHESTER*** book and movie use storytelling, photography and video to explore life science and create a memorable and engaging lesson for children.

### ***Supports STEM***

***THE STORY OF CHESTER*** book and movie are examples of content meeting Next Generation Standards, Interdependent Relationships in Ecosystems: Animals, Plants, and Their Environment: K-SL1-1, K-ESS3-1, and K-ESS-3 PLUS Common Core Standards for English Language Arts: Key Ideas and Details, Craft and Structure, and Integration of Knowledge and Ideas - all necessary to tell “science-based” stories.

They also integrate English Language Arts and science while enhancing creativity and illustrate creative arts technology through photography, video and computer editing.
